About us

CAP is a green agriculture technology and a farming company involved in agricultural crop production. CAP has initiated a project in Sri Lanka with the main purpose of establishing and developing the agro-business in the country.

CAP has embarked on a business rollout plan which comprises of:

- The upgrade and expansion of CAP's vertically integrated operations.
- The expansion and modernization of the Company's primary agricultural operations.
- Support the growth of the Company's operations.

Vision

Augmenting value addition to crops to develop a sustainable organic agro based industry.

Mission

To grow the Agro business in Sri Lanka, by guiding and training farmers to use the latest technology and develop organic farming of the highest quality, Develop infrastructure, Improve lifestyles and social standing of farmers by providing a real value for their produce. The quality produce from the farms to be developed into value added products that generate increased forex and local revenues.

Values

Integrity | Respect | Diversity | Sustainability | Gender Equality

With sustainable farming

100% Organic

Increase the availability of organic fruit and vegetable supply.

Super healthy

Pesticide and chemical-free healthy production of crops.

Improving lives

Providing planting seeds and microfinance services for farmers.

Moral and conscience

We care about environmental and social welfare and culture.

Value Additions to Agro Business and
Exporting

A black and white portrait of Ranjan T. Hanchapola, a man with a beard and mustache, looking slightly to the right. He is wearing a dark shirt with a small 'RVCA' logo on the chest.

The Founder Managing Director of the CAP Group, Ranjan is an enthusiastic young entrepreneur, born to an agricultural family from the eastern province of Sri Lanka.

Having graduated as a Bachelor in Arts in Economic and International Studies, Ranjan started a career in the field of construction leading him to pursue studies in the field of Construction Management and Quantity Surveying

A Quantity Surveyor by profession then, he worked in the commercial sector, before becoming the Project Coordinator of the United Nations Office for Project Service (UNOPS) team. Here he was engaged as a consultant for a plantation project operated by a group of Norwegians. Working with this group inspired him to believe that opportunities existed for farming which led him to start his own plantation, thus leading to his long-term dream & passion of becoming an Agro Entrepreneur to uplift the rural farming community of Sri Lanka.

Ranjan engaged in the business of culti-

vating and exporting of Super-fruits, Special Spices and Vegetables by motivating farmers to join him on the journey through special training programmes where wide knowledge was disseminated in the modern dynamics of the trade and supporting them to embark on these ventures by arranging finance and offering those joining him guaranteed prices for their produce.

Being in cultivation, Ranjan, began to understand the plight and challenges of farmers in disposing of highly perishable fruits in short time frames, which drove him to probe methods that could preserve the crops. This led him to identify the opportunity for developing value added products which is today in big demand.

His Innovative, dynamic and charismatic character has helped him within a short span of time to develop healthy relationships with farmers, local authorities and international buyers and move towards establishing a global brand with an exclusive range of products.

HEALTH BENEFITS OF SOURSOP

01 Diabetes

Drinking tea made from soursop can help lactating mothers to produce more milk. The hypoglycemic properties of the soursop can help regulate the level of blood sugar of a diabetic person. There are no side effects of drinking the soursop.

02 High Blood Pressure

The hypotensive properties found in the soursop are said to be an effective natural alternative for people suffering from hypertension.

03 Milk Production

Drinking tea made from soursop can help lactating mothers to produce more milk.

more details

04 Antimicrobial Properties

Scientific studies show that soursop has the following antimicrobial properties:

| | |
|--------------|---------------|
| Antimalarial | Antiphrastic |
| Antiviruses | Antibacterial |

05

Bone Health

Soursop leaves contain at least 25 percent calcium, which plays an integral part in keeping the bones strong and healthy

06

Energy Booster

Thiamine can be found in soursop. This essential vitamin converts the sugar in the human body into energy.

07

Herpes

People suffering from herpes should drink soursop leaves tea in order to prevent outbreaks.

08

Stress Reliever

Just like chocolates and other sugary foods, soursop can fix a woebegone mood.

09

Nerves

Tension nerves can appear anytime. So in order to keep the nerves, calm drinking soursop can be the immediate and natural solution

10

Muscle Cramps

Soursop has potassium, which prevents the development of the muscle cramps.

11

Constipation

Fiber is present in every soursop drinking tea made from soursop leaves that can address this digestive problem.

12

Cholesterol Count

The niacin found in the soursop can help regulate the bad cholesterol, as well as boosting the good cholesterol.

13

Urinary Tract Infection

According to scientific research, vitamin C stops the accumulation of bacteria in the urinary tract of the human body. Thus, preventing the development of an infection. The soursop contains vitamin C.

14

Anemia

A great amount of iron can be found in soursop leaves. In case you are not aware, lack of iron in the human body is the primary reason for anemia.

15 Pregnancy

The folate, a B vitamin, helps a pregnant woman away from developing any deficiency. Soursop contains folate.

20

Anticarcinogenic Properties

According to the Journal of Natural Products, the soursop fruits & leaves are considered 10,000 times more effective than the Adriamycin, a drug used in chemotherapy.

16

Migraine

The excruciating pain brought by a migraine is so annoying. The riboflavin present in soursop leaves can address this problem.

19

Doresopathy

Back pain can be lessened when drinking soursop leaf tea & fruit juice.

18

Immune System Booster

In order to improve the function of the immune system, drinking soursop leaves tea & fruit juice can be a great idea.

Researchers have found that soursop leaf tea can help contribute to fat loss by increasing the body's metabolism.

17

Rheumatoid Arthritis

The painful sensation throughout the body caused by rheumatoid arthritis can be relieved by using soursop.

Test Reports

Out-Grower Project

(with Ministry of Agriculture & SAPP)

We have started two projects with MOA (The Ministry of Agriculture) & SAPP (Smallholder Agribusiness Partnerships Programme) as a business the promotor Social and Economic Development priority is paramount in the people of Monaragala district. The women population has recorded around 49% of the total population of the district. By considering the above situation, CAP Green Forest Private Limited has kept the initial step to uplift 500 women Farmers in Monaragala with the support of the CAP Farmer Foundation and later to increase up to 3000. Women Farmer the Monaragala Association (WFMA) was established in May 2017 and the organization is located in the area of Monaragala district of Sri Lanka. WFMA believes rural minority women have often been neglected in terms of social and economic development and the lack of resources has stagnated rural development. WFMA is the first woman owned and operated association in the area of Monaragala that aiming women's social and economic development through cultivation.

i) How We Support Them – Out Grower by back system

As per the proposed system, the social and economic wellbeing of the selected women are expected to uplift. The selected women farmers are given technical knowledge, training and Support. Then we supply Plants materials. Their Responsibility to plant and care until harvesting and by buy back by from us with a guaranteed price. Also, this is not a full-time job that they need to engage while taking harvesting then can take another regular income with other intercrops or work as a paid farmer in our largescale land when we needed.

ii) Vision and Mission

"Economic Empowerment and eliminate poverty by increasing the Women's income and wellbeing through, regional grown Fruits & vegetables while expanding income opportunities "

iii) Objectives/goals

- We strive to meet the needs of a growing population, to protect and preserve their farms, to help improve their lives while making agriculture more viable and rewarding
- To produce natural and environmentally friendly products
- To promote high nutritious and medical value added agricultural products
- Creating a profitable market for the products
- To extend and contribute technical knowledge to farmers and

upgrade their agricultural practices

- To strengthen the productive capacity of the women members.
- To create a sense of awareness for the women folk towards sustainable agriculture production
- To corporate between our small business units (CAP Green Forest, Farmers Foundation, WMEC) which can lead to the best image in the mind of stakeholders as farmers, community, employees, shareholders and government in the long term.

Road Map

CEO of CAP Organic visited Northland on August 2018 to attend the Horticulture Agri conference. He has met Mr. Wim Damsteegt, Partner & CEO of Dutch Greenery in the Netherlands (The largest seed manufacturing company in the world)

CEO of CAP Organic visited India in November 2018 to attend post harvesting conference. He has met Mr. Ashvin Sunny, chairman of AGRIPLAST (Largest greenhouse manufacture in south Asia)

Mr. Jeroen Baas Partner and Post harvesting specialist of Baas Agricultural Services -Thailand has visited the CAP Green farm and given to worth instruction to harvesting and post harvesting technology to protect our crops.

We, CAP Organic has made a strong agreement between Norwegian and Chinese company to trade and marketing our value-added product in their countries. Several meetings and negotiations had with both parties, the finally all have come to the final decision. So in 2021, our products will be sold in the worldwide.

The Managing director of The Graviola Tea Company in the USA visited our farm in February 2019 and inspected the soursop plantation and Graviola leaf tea making process. We, CAP Organic and The Graviola Tea Company made a strong agreement, We are exporting every month Graviola leaf tea to the USA

The Norwegian specialist visited our land in 2016

The Norwegian Crop specialist visited our lands and gave to valuable advice on how to do 100% organic cultivation

CEO of CAP Organic visited China to attend International Canton Fair in 2018

They provide one-stop agricultural solutions for farmers and agribusiness from planting to sales. It will become the most professional international agricultural expo in China and provide one-stop production and marketing platform for global high-quality agricultural products. The exhibition will gather more than 20 countries and regions to bring the best agricultural products and agricultural technology to the exhibition.

Agricultural planting machinery; water-saving irrigation devices; agricultural facilities and equipment; agricultural and sideline product processing machinery; signature agricultural machinery for the production of tea, edible fungus, etc.; garden machinery; agricultural transport machinery; engineering machinery that is applicable in agriculture and various kinds of agricultural machinery accessories.

The expo will consist of 4 special exhibitions +2 special conferences; In addition, during the exhibition, "recommended products for world agricultural expo every year" will be selected and certificates will be issued.

The Australian soil and water specialist has visited us at the end of 2015 and did the soil testing with a soil nutrition analyst.

And also we found a good water source for a tube well. We know that soil is a key element of agriculture. Without it we would not be able to grow the plants, which are used as food for both humans and animals. There are two important aspects we are discuss here with soil properties that are concerned. First, we focus on its hydraulic conductivity, the ability of the soil to manage, hold or drain water. Second, we look at its nutrient management, we refer to the chemical as well as mineral makeup of the soil as the consistency as well as soil texture every soil is a mixture of three main competent sands, clay and silt.

CEO of CAP Green attends to the Agri Technica Asia

– Largest Agri Conference in Bangkok 2018

The study of post harvesting and value addition technology is most important, Harvested fruits and vegetables require adequate and advanced post-harvest processing technologies for minimizing the qualitative as well as quantitative losses after harvesting. Nearly 40% of fruits and vegetables are wasted every year due to improper handling, storage, packaging, and transportation. Value-added agriculture may also refer to increasing the economic value of a commodity through particular production processes, e.g., organic produce, or through regionally branded products that increase consumer appeal and willingness to pay a premium over similar but undifferentiated products.

Value-added agriculture refers more generally to that increase the value of primary agricultural commodities. Value-added agriculture may also refer to increasing the economic value of a commodity through particular production processes, e.g., organic produce, or through regionally branded products that increase consumer appeal and willingness to pay a premium over similar but undifferentiated products. It can also be described as the process that transforms the raw agricultural product into something new through packaging, processing, cooling, drying, extracting, and other processes that change a product from its original raw form. [1] As a result of this transformation, the customer base of a product and revenue sources for the producer are expanded.

CEO of CAP Organic visited Dubai to attend Gulfood live in-person 2021

The world's largest event for F&B processing, packaging and ingredients, enabling F&B manufacturers to deliver best-quality products through the most advanced machinery & production solutions.

The annual event that matters for food manufacturing globally, Gulfood Manufacturing returns live in-person from 7-9 November 2021 at Dubai World Trade Centre.

Every year the world's biggest food manufacturers take over the show floor to unveil their advanced technologies – from production to processing to packaging.
